MRS. HERBERT HOOVER

Nobility and Standard Rose Plants

. for .

1930

L. B. Coddington
Grower and Hybridizer
Murray Hill, New Jersey

Standard Varieties

TEMPLAR. A lovely, bright red, with good foliage; fine producer and opens up in fine shape. A clean, responsive grower; good stems and handsome habits. A rose that any one can grow.

BRIARCLIFF. A sport of Columbia, retaining all of the good qualities of its parent, color more brilliant being a true rose-pink without any shadings whatever. Long pointed bud and very fragrant.

BUTTERFLY. A glorified Ophelia. One of the most beautiful roses, daintiness combined with fragrance.

RAPTURE. An exquisite salmon shade, deeper than the best Butterfly, with the same golden flush at the base of the petals.

THE GOLD MEDAL ROSE

President Hoover

Parentage: Sensation X Claudius Pernet

“PRESIDENT HOOVER” is a gorgeous combination of cerise, bronze, and yellow. The outer petals are flushed with cerise, while its golden center of bronze and yellow is most enchanting. It is a wonderful grower. The flower is large and the bud beautifully pointed.

The exquisite fragrance of this rose is one of its strongest points. It is a wonderful grower, and everyone will be delighted with its habit of growth.

It is a selection of over forty thousand seedlings and was awarded the *Gold Medal* at the International Flower Show in New York, 1929, as the best undisseminated Novelty, also at the Newark, New Jersey Flower Show, November, 1929.

MRS. HERBERT HOOVER. This is one of the finest colored crimsons that has ever been introduced. It produces a profusion of blooms. The fragrance is most delightful. Awarded *Silver Medal* New Jersey Flower Show, November, 1929.

AUTUMN. The most wonderful combination of crimson-scarlet and yellow. The flowers are splendidly shaped with stiff petals that endure much handling without injury. This rose should be very popular because of its spectacular color.

AS TO TIME OF DELIVERY

We begin as soon as our conditions allow (usually about the middle of May), filling orders in rotation, as far as possible and practical.

Plants are too large for parcel post. We charge single plant rate and postage if sent by mail.

Please give full and complete address, and shipping or delivery instructions. We try to deliver by truck within reasonable distance of Murray Hill.

We close every evening at five o'clock and all day Sunday.

TO CARRY THE PLANTS THROUGH THE WINTER WE RECOMMEND THE FOLLOWING SIMPLE METHOD:

Before the ground is frozen too hard, usually about the middle of November, procure some rough straw litter, or branches of evergreen, or dried leaves and put around the lower parts of plants, to a height of about one foot. Cover this with a little soil to prevent the wind from blowing it away. In the Spring remove this and cut away the wood killed by frost, giving a mulching of well-rotted manure.

The plants are ready for planting as received, but can be pruned back a little if so desired. Plant firmly, and water as conditions of soil and weather make it advisable.
